

NEW RELEASE

HIFLO PERFORMANCE

DashHawk

The new DashHawk is an amazingly compact intelligent device that will provide you with real-time information about your vehicle's operation, diagnostic trouble codes, vehicle performance, and other useful information. User programmable alerts keep a watchful eye on critical items, while you can use the various data to alter your driving habits for maximum economy, maximum performance or for various tuning functions.

The DashHawk suits a wide range of new vehicles that utilize the CAN-BUS communication port.

Not much bigger than a credit card and installs with no tools in seconds! Easy to move between vehicles in minutes! Simply plug it into the diagnostic port under your dash!

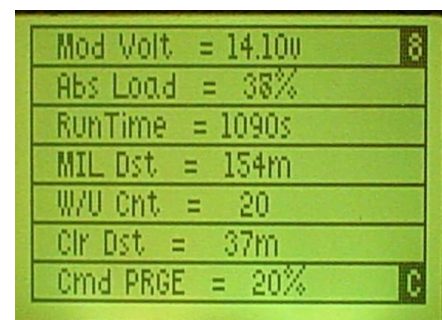

DashHawk Features:

- Universal OBDII multi-gauge displays over 100 parameters
- Connects to your vehicle's diagnostic port
- Display 0 – 100 kph and 1/4-mile times with up to five other parameters
- Records maximum values for speed, RPM and water temperature
- Accepts one additional sensor, such as a wideband O2 sensor
- Backlit screen can be set to 16 million colors to match any interior
- Set visual and audible alerts for any value
- Built-in shift light capability
- Check and clear trouble codes
- Any parameter can be displayed on any screen, in any order, in any fashion!

2 Function Bar Graph

Display up to 7 engine parameters
